## PREFACE

The twenty-first annual volume of the *Industrial Arts Index* covers practically the same list of magazines and has been compiled by the same staff as the 1932 annual. *Advertising Arts* and *American Ceramic Society Bulletin* have become full-fledged journals and are both indexed. The former was previously a section of *Advertising and Selling*, and the latter a department of the *American Ceramic Society Journal*. The new periodical *Econostat*, now discontinued, was indexed from March 1933. *Industrial Standardization*, published by the American Standards Association, has for some time been represented in the *Index* by occasional articles. Since the American Standards Association has taken over some of the activities of the United States Bureau of Standards and the Bureau has discontinued the publication of *Commercial Standards Monthly*, this periodical, *Industrial Standardization*, has been added to the list of periodicals regularly indexed. Another addition is *Transactions of the Institution of Chemical Engineers*, London, an annual publication, the indexing of which began with volume, 9, 1931. Finally the *Bulletin of the International Management Institute* has been indexed beginning with January, 1933.

Subject entries for 2300 books, published during the year, are included in this volume. These have appeared in the lists of "Recent Book Titles" in a section of the *Index* preceding the main alphabet of which it later forms a part. It should be said for the benefit of new subscribers, and there are such, that included in this volume also are many United States government publications, state geological and engineering bulletins, university bulletins relating to business and technology, and bibliographical bulletins from various sources.

The list of technical and trade associations which has been printed every other year as a part of the annual volumes has been revised by Leona Kohn and will be found on the following pages. Many organizations are merging, new societies are in process of formation, others are changing their names, and many others are shyly reluctant to divulge their addresses or the names of secretaries. Painstaking effort in compiling the list has resulted in a directory, not perfect as planned, but, it is hoped, useful to subscribers.
